Art Unit 1713

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3, 5-8, 10-12, 14-17, 19, 20 and 22-24 are rejected under 35 U.S.C. § 103(a) as being unpatentable over Hori et al. or Van Der Groep.

Each of these patents teaches vulcanizable rubber compositions which incorporate therein the instantly claimed thermoplastic polymers, rubbers, fillers and functional additives as instantly claimed. See specifically Hori at column 2 lines 45+ and further at columns 5 and 6 and Van Der Groep at columns 5 and 6 as well. In view of this disclosure, applicants' claims are rendered prima facie obvious. Applicants should note that obviousness does not require absolute predictability but rather a reasonable expectation of success. Furthermore it is prima facie obvious to combine known ingredients and have them function in an expected manner. The Examiner maintains that each of applicants' ingredients is known and is functioning as one would expect. It is prima facie obvious to mix ingredients and adjust the relative
